Executive Summary

This project aims to develop a responsive web application with clean, documented, and secure code, implementing all required features and functionalities according to specifications. Thorough documentation and well-organized, maintainable code are also key deliverables of this project.

Scope of Work

Develop a responsive web application with clean, documented and secure code. Implement all required features and functionalities according to specifications. Provide thorough documentation and ensure code is well-organized and maintainable.

Requirements

- Code must be clean, documented, and secure
- Full knowledge and experience in all required skills except Next.js

Deliverables

Login Page (1 page)

User authentication and login functionality

Dashboard (1 page)

Main interface for users to view and manage their data

User Profiles (1 page)

Pricing Summary

Item	Unit Price	Qty	Total
Login Page	\$1.00	1	\$1.00
Dashboard	\$2.00	1	\$2.00
User Profiles	\$3.00	1	\$3.00

Editable user profiles with relevant information

Database Integration (1 system)

Integration with a backend database system for data storage and retrieval

API Endpoints (10 endpoint)

Development and implementation of required API endpoints for data manipulation

User Pro-
files

Database Integration	\$4.00	1	\$4.00
----------------------	--------	---	--------

API End-points	\$5.00	10	\$50.00
----------------	--------	----	---------

TOTAL			\$60.00
-------	--	--	---------

Work Breakdown

Login Page Development (7 days)

Dashboard Development (10 days)

Depends on:

- Login Page Development

User Profiles Development (8 days)

Depends on:

- Login Page Development

Database Integration (12 days)

Depends on:

- Login Page Development

API Endpoint Development (14 days)

Depends on:

- Login Page Development
