job3

Prepared for: | Date: 03/05/2025

Executive Summary

The project aims to develop cutting-edge products and intelligent backend services using a variety of technologies including Python, Node.js, TypeScript, Ruby on Rails, Vue.js, ReactNative, and PostgreSQL. Bonus skills in AI assistants, automation frameworks, and experience with AWS and Google Cloud are also required. The ideal candidate must be a fast learner.

Scope of Work

Develop cutting-edge products and intelligent backend services using Python, Node.js, TypeScript, Ruby on Rails, Vue.js, ReactNative, and PostgreSQL. Bonus skills include experience with AI assistants and automation frameworks, as well as familiarity with cloud platforms like AWS and Google Cloud. Must be a fast learner.

Requirements

• Core strengths in Python, Node.js, Vue.js, React.js, and PostgreSQL

• Experience with Google Cloud and AWS (Lambda/S3)

• Demonstrated ability to quickly learn new technologies (e.g. mastered Flutter for Airvi projects)

Deliverables

Python backend services (5 services)

Cutting-edge backend services using Python

Vue.js web applications (3 applications)

Pricing Summary

Item	Unit Price	Qty	Total
	$11.00	5	$55.00

Intelligent web applications using Vue.js

AWS Lambda functions (10 functions)

Serverless functions on AWS Lambda

Google Cloud AI models (2 models)

AI models developed on Google Cloud

Python backend services			
Vue.js web applications	$12.00	3	$36.00
AWS Lambda functions	$13.00	10	$130.00
Google Cloud AI models	$14.00	2	$28.00
TOTAL			**$249.00**

Work Breakdown

Python backend services (14 days)

Node.js backend services (14 days)

Vue.js web applications (10 days)

ReactNative mobile applications (21 days)

PostgreSQL database design (7 days)

Google Cloud AI models (21 days)

Depends on:

- PostgreSQL database design

AWS Lambda functions (14 days)

Depends on:

• Python backend services

Automation frameworks development (21 days)

Depends on:

• Node.js backend services

Project Timeline

Backend Services
Invalid Date - Invalid Date

Web and Mobile Applications
Invalid Date - Invalid Date

Database and AI Models
Invalid Date - Invalid Date

Automation and Cloud Integration
Invalid Date - Invalid Date

Payment Schedule

Phase	Milestone	Due Date	Amount
Backend Services	Initial	Invalid Date	$62.25 (25%)
Web and Mobile Applications	Initial	Invalid Date	$62.25 (25%)

Database and AI Models	Initial	Invalid Date	$62.25 (25%)
Automation and Cloud Integration	Initial	Invalid Date	$62.25 (25%)
